Arien Cherones
OHSU Cardio Thoracic

Log a Milestone Case

Cardiopulmonary Bypass, Myocardial Protection and Temporary Circulatory Support - Patient Care and Technical Skills Close

Level 1

- Demonstrates basic surgical skills (simulation vs. OR).

Level 2

- Performs axillary, femoral, arterial, or venous cannulation.
- Performs peripheral vascular access.
- Performs surgical opening and closing.
- Assists perfusionist with cardiopulmonary bypass setup and pump run.

Level 3

- Cannulates and institutes cardiopulmonary bypass, including myocardial protection in routine cases.
- Manages cardiopulmonary bypass and myocardial protection in routine cases.
- Weans and decannulates from cardiopulmonary bypass for routine cases.
- Recognizes and manages common acute complications (e.g., coagulopathy, pump failure).

Level 4

- Cannulates and institutes cardiopulmonary bypass, including myocardial protection in complex cases.
- Manages cardiopulmonary bypass and myocardial protection in complex cases.
- Weans and decannulates from cardiopulmonary bypass for complex cases.
- Institutes temporary circulatory support for cardiogenic shock (e.g., intraaortic balloon pump, ECMO, short term left ventricular [LV] assist).
- Recognizes and manages unusual acute complications (e.g., aortic dissection).

Level 5

- Operates in a hostile chest (e.g., radiation, porcelain aorta, use of epiaortic probe, patent grafts).

GREEN = COMPLETE!
RED = Not Complete
No check = N/A
When done hit close
